

Oratile Eleanor Peu - Software Engineer & Analyst

Mafikeng, North West, | 0679563824 | oratilepeu01@gmail.com | <https://www.linkedin.com/in/oratile-peu-3b1b15239/>

SUMMARY

I am a result-driven front-end engineer and business analyst with proven experience developing applications that solve real-world problems, one good example being a USSD | Mobile and Web Application Health Care Access Booking Platform aimed at solving a hindering problem of limited access of essential health care services in rural and underprivileged areas such as remote requesting of ambulance, medication, booking of appointments. I am proficient in technologies like HTML, CSS, JavaScript, SQL, Python, Java, Node JS, React JavaScript, MATLAB, and C++.

SKILLS & INTERESTS

Skills:

HTML | CSS | JavaScript | Java | Node JS | React JavaScript | SQL | PowerBI | C++ | Python | Java | MATLAB | JIRA Figma | GitHub [GIT] | Data Structures and Algorithms **Interests:**
Software Engineering | Data Analysis | Business Analysis

EDUCATION

North West University

BSc Computer Science and Physics

Mafikeng

Graduation Date: May 2026

PROJECT EXPERIENCE

FNB App of The Year Hackathon: Health Care Bridge

Mafikeng

React JavaScript | Bootstrap | Figma | Node JS

26 October 2024 – 28 November 2024

About Project: A USSD | Mobile and Web Application Health Care Access Booking Platform aimed at solving a hindering problem of limited access of essential health care services in rural and underprivileged areas such as remote requesting of ambulance, medication, booking of appointments as well as mobile clinics if available. The application also has automated reminders for appointments, medication reminders and communication through USSD, SMS And in App.

- **Role: UI Designer and Front-end Engineer**
- **USSD Appointment Scheduling:** Aim being to reduce patient waiting times by 70% through a USSD appointment booking and scheduling system.
- **USSD Medication and Treatment Requests:** Implemented a feature that allow patient to request medications through the app or USSD service, which is particularly beneficial for those who live far from clinics. This feature ensures that users can receive essential medication without frequent travel, addressing both financial and geographical barriers
- **Remote Diagnosis:** Implemented secure USSD remote diagnostic feature that allowed patient to self-diagnose themselves **by leveraging AI API's** also allowing medical practitioners to diagnose and monitor patient conditions.
- **Video Consultations:** Enabled remote consultations for patient with access to smartphones since the application also leverages mobile application is not just a USSD based platform, aimed at reducing in-person visits by atleast 60% and expanding access to care for patient in remote areas.

SMS and WhatsApp Communication: Since SMS and WhatsApp are widely accessible, especially in rural communities, our app includes automated notifications for appointment reminders, medication updates, and follow-ups. This communication feature helps patients stay informed about their healthcare, promoting adherence to

Final Year Project: NWU E-Commerce Book Store

Project Manager | Lead | Developer

September 2023- October 2023

Led a team of 4 students in developing a comprehensive E-commerce that sold second hand books to underprivileged students who needed textbooks and students who needed extra money to buy new books for coming semesters.

- **Coordinated project milestones**, conducted weekly progress reviews, and ensured the team adhered to project timelines and deliverables.
- **Oversaw quality assurance testing** and deployment, ensuring a user-friendly and secure experience for both student sellers and buyers.
